Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
import java.util.*;
class monica{
   public static void main(String args[]){
      Scanner sc = new Scanner(System.in);
      int N=sc.nextInt();
      int[][] matrix=new int[N][N];

      for(int i=0;i<N;i++){
         for(int j=0;j<N;j++){
            matrix[i][j]= sc.nextInt();
         }
      }
         int main=0;
         int sec=0;
         for(int i=0;i<N;i++){
            main+=matrix[i][i];
            sec+=matrix[i][N-1-i];
         }
```

```
        System.out.println("Sum of the main diagonal:"+main);
        System.out.println("Sum of the secondary diagonal:"+sec);

    }
}
```
