## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a-z, A-Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @\$ Hi

Output: Hello Hi

### **Answer**

```
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        String sentence = sc.nextLine();
        String[] words = sentence.split(" ");

        StringBuilder validWords = new StringBuilder();

        for (String word : words) {
            if (isValidWord(word)) {
                if (validWords.length() > 0) {
                    validWords.append(" ");
                }
                validWords.append(word);
            }
        }

        if (validWords.length() > 0) {
            System.out.println(validWords);
        } else {
            System.out.println("No valid words.");
        }

        sc.close();
    }
}
```

```
private static boolean isValidWord(String word) {
```

```
    if (word.length() < 2) {  
        return false;  
    }
```

```
    for (int i = 0; i < word.length(); i++) {  
        char ch = word.charAt(i);  
        if (!Character.isLetter(ch)) {  
            return false;  
        }  
    }
```

```
    return true;  
}
```

**Status :** Correct

**Marks :** 10/10
