Branch: REC

Department: CSE - Section 10

Batch: 2028

Degree: B.E - CSE

2024_28_III_OOPS Using Java Lab

2028_REC_OOPS using Java_Week 1_Q5

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement:

Emily has a beautiful circular garden in her backyard. She's interested in calculating two important measurements for her garden: the circumference and the area. To do this, she needs a program that can take the radius of her circular garden as input and provide the calculated circumference and area as output. The formulas she should use are as follows:

To calculate the circumference (C) of a circle, you can use the formula:

$$C = 2 * \pi * r$$

$$A = \pi * r^2$$

Where:

C represents the circumference.

A represents the area.

 π (pi) is approximately 3.14159.

r is the radius of the circle.

Emily is not a programmer, and she needs your help to create a program that will make these calculations for her garden.

Input Format

The first line of input contains a single double-point number radius, representing the radius of the circle.

Output Format

The output should consist of two lines:

The first line should print the circumference of the circle rounded to 2 decimal places, followed by the unit "meters".

The second line should print the area of the circle rounded to 2 decimal places, followed by the unit "square meters".

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3.0

Output: Circumference: 18.85 meters

Area: 28.27 square meters

Answer

```
import java.util.Scanner;
class calc{
  public static void main(String args[]){
     Scanner sc=new Scanner(System.in);
```

double radius=sc.nextDouble();
double PI=3.14159;

```
double circum=2*PI*radius;
double area=PI*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*radius*ra
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                240701503
                                                                                                    double circum=2*PI*radius;
double area=PI*radius*radius;
System.out.printf("Circumference: %.2f meters%n",circum);
System.out.printf("Area: %.2f.cquare restaus". "
                                                                                                            System.out.printf("Area: %.2f square meters%n",area);
                                          }
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Marks: 10/10
