Branch: REC

Department: CSE - Section 10

Batch: 2028

Degree: B.E - CSE

## 2024\_28\_III\_OOPS Using Java Lab

2028\_REC\_OOPS using Java\_Week 7\_Q3

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

#### 1. Problem Statement

A financial analyst, Alex, needs a program to calculate simple interest for various financial transactions. He requires a straightforward tool that takes in the principal amount, interest rate, and time in years and computes the interest.

The formula to be used is: Interest = Principal × Rate × Time / 100

Implement this functionality using the InterestCalculator interface and the SimpleInterestCalculator class.

### **Input Format**

The first line of input consists of the principal amount P as a double value.

The second line of input consists of the annual interest rate r as a double value.

The third line of input consists of the number of years t as a positive integer, which is an integer value.

#### **Output Format**

The output displays the calculated simple interest in the following format: "Simple Interest: [interest\_value]", Here, [interest\_value] should be replaced with the actual interest value calculated by the program.

Refer to the sample output for the formatting specifications.

```
Sample Test Case
Input: 1000.00
5.00
Output: Simple Interest: 100.0
Answer
import java.util.Scanner;
interface InterestCalculator {
  double simpleInterest(double principal, double rate, int time);
class SimpleInterestCalculator implements InterestCalculator {
  public double simpleInterest(double principal, double rate, int time) {
    return (principal * rate * time) / 100;
}
class Main {
  public static void main(String[] args) {
    Scanner scanner = new Scanner(System.in);
    double principal = scanner.nextDouble();
    double rate = scanner.nextDouble();
```

```
InterestCalor!
        InterestCalculator calculator = new SimpleInterestCalculator();
        double interest = calculator.simpleInterest(principal, rate, time);
        System.out.println("Simple Interest: " + interest);
   }
    Status: Correct
                                                                  Marks: 10/10
```
